Professional Summary

Electronics and Communication Engineering graduate with hands-on experience in Java-based application development, MySQL, JDBC, and web technologies through internships and projects. Strong foundation in object-oriented programming, database operations, debugging, computer networks, and application troubleshooting. Quick learner with strong analytical and troubleshooting skills and an interest in enterprise IT and infrastructure technologies.

Technical Skills

Programming: Java

Web Technologies: HTML5, CSS3, Java Script, JSP.

Backend: J2EE, Hibernate, Spring Core, Spring ORM, Spring MVC, JDBC, Servlets.

Database: MySQL

Core Concepts: OOP, Exception Handling, Computer Networks

AI-Assisted Tools: ChatGPT, Microsoft Copilot, Google Gemini, Claude, Cursor, Lovable, Eraser

Tools: Git, GitHub, Apache Tomcat, Microsoft excel

Soft Skills: Problem Solving, Troubleshooting, Communication, Adaptability, Quick Learning

Internship Experience

Java Full Stack Development Intern

Jan 2026 – Aug 2026

TAP Academy

- Developed Java-based applications using core Java, OOP concepts, JDBC, HTML, CSS, and MySQL.
- Implemented database operations using SQL and JDBC for application data management.
- Practiced object-oriented programming and developed application features based on given requirements.
- Tested application functionality and identified and resolved errors during development.

Application Developer Intern – Web & Mobile

May 2025 – Jul 2025 [View Certificate](#)

Rooman Technologies Pvt. Ltd.

- Assisted in the development and testing of web and mobile applications.
- Supported the implementation of application features based on project requirements.
- Identified application issues through debugging and supported defect resolution.
- Participated in software testing and verification to ensure expected application functionality.

Projects

Foodie Hub – Online Food Delivery Web Application

[GitHub](#)

- Developed a full-stack food ordering application using Java, JDBC, MySQL, Servlets, HTML, JSP, JavaScript and CSS.
- Implemented user authentication, restaurant browsing, menu management, cart and order processing.
- Used SQL and JDBC to perform database operations and manage application data.
- Tested application features and identified and resolved application and database issues.

Responsive Multi-Page Website

[GitHub](#)

- Developed a responsive multi-page website using HTML5 and CSS3.
- Designed structured web pages with clear navigation and user-friendly interfaces.
- Applied CSS styling and responsive layouts to ensure consistent display across different screen sizes.

Education

Sri Venkateswara Institute of Technology

2023 – 2026

B.Tech in Electronics and Communication Engineering

CGPA: 8.3

PVKK College

2020 – 2023

Diploma in Electronics and Communication Engineering

CGPA: 8.7

Rao's English Medium High School

2019 – 2020

SSC

CGPA: 9.8

Achievements

- Secured First Place in Technical Expo Competition.
- Secured First Place in PowerPoint Presentation Competition.
- Developed a full-stack Java web application integrating Java, JDBC, MySQL, HTML and CSS.
